

Helping you transition into an in-house role

---

Dates: **29 July 2025** | Venue: Online via Microsoft Teams

## About the online program

The transition into an in-house role presents an exciting opportunity to develop new skills and change the way you practise law. As with every change, while you embrace the opportunities, you might also face some challenges.

To support you during this transition, the Law Society is pleased to invite you to join us at our **In-House Induction 2025**. This exclusive program will be offered Online via Microsoft Teams for a full day in July.

Throughout the course of the day you will hear from senior Law Society solicitors who will explore some of the ethical challenges in-house lawyers face and discuss the important issues of confidentiality and privilege. You will also hear from experienced General Counsel, legal operations and wellbeing and career experts who will give you practical guidance and tips on how to successfully navigate the transition and ensure you have the foundations to forge a rewarding in-house career.

We look forward to welcoming you.
